

Understanding Autism

Approximately 50% of people who watch the selective attention test do not see the gorilla. This is an excellent example of what happens when we are overly focused on details.

1. How does this experiment increase your awareness of your student's view of the world?

2. What did you realize from this activity that you didn't realize before?

3. How will this knowledge impact your interactions with and supports for students with autism?

4. What surprised you about this activity?

5. As you reflect on this activity, how has it supported your thinking?
